

P J Hayman & Co Ltd Cookie Policy

A cookie is a small text file that is placed on a computer or smartphone when an individual visits a website. We use cookies to enable our website to operate correctly, to enhance your customer experience, track where visitors have come from and record other website activity as well as help us to improve our service to you. Cookies do not store your personal information; they store information about your preferences and actions when browsing our website.

Most browsers will usually allow cookies to be set automatically, but if you would prefer not to accept cookies you can change the settings in your internet browser. Please be aware that if you delete certain cookies and/or turn cookies off, this website will not function correctly.

Cookies we use on this website may fall into one of the four following categories:

Strictly necessary cookies

These cookies enable you to get the information or service you have asked for. They are essential and without them some services may not work and the functionality of our site may be affected.

Performance (Tracking) cookies

We use Google Analytics to collect standard internet log information and details of visitor behaviour patterns. We do this to find out things such as the number of visitors to the various parts of the site. This information is only processed in a way which does not identify anyone. We do not make, and do not allow Google to make, any attempt to find out the identities of those visiting our website. If we do want to collect personally identifiable information through our website, we will be up front about this. We will make it clear when we collect personal information and will explain what we intend to do with it.

For information about the data Google Analytics' cookies contain, visit: www.support.google.com/analytics/answer/6004245

Functionality cookies

These cookies remember choices you have made and data you have previously supplied to personalise our site for you. They may remember changes you have made to help you browse, such as increasing the text size or may remember personal details you have provided so that you do not need to input them again.

Targeting or advertising cookies

We use third party cookies to show you appropriate offers and advertising as you browse other sites on the internet. For example, to remind you of products and services that you have shown an interest in. These offers and advertisements are based on the way you have interacted with our website.

Embedded content on this website also uses cookies which are set from a third party website. You can view the cookie policy on the third party website.

How do I change my cookie settings?

Most web browsers allow some control of most cookies through the browser settings. To find out more about cookies, including how to see what cookies have been set, visit

www.aboutcookies.org.uk or www.allaboutcookies.org. You can also learn more about cookies at: www.bbc.co.uk/webwise/guides/about-cookies

Overall, cookies help us provide you with a better website, by enabling us to monitor which pages you find useful and which you do not. A cookie in no way gives us access to your computer or any information about you, other than the data you choose to share with us. You can choose to accept or decline cookies. Most web browsers automatically accept cookies, but you can usually modify your browser setting to decline cookies if you prefer. This may prevent you from taking full advantage of our site.

Links to other sites

On this website you may be offered links to other sites. However, please be aware that we have no control over such sites. You agree that we are not responsible for the availability or content of, or products and services available on those websites. You are advised to read the cookie policy of other sites.

Changes in this cookie policy

We reserve the right to modify this cookie policy without notice and so you should check the position each time you visit our web site.
